one identified potential risk factor for developing NMS is the period during a switch from one antipsychotic treatment to another.

I leaned toward the snowy owl but didn't realize it was "taken" by Quebec

but if tobacco from Mexico or coca from the Andes was carried across an ocean, it apparently need not have been the Atlantic

"A common story I hear is that they got their first prescription from a primary care provider when they presented with complaints of anxiety or trouble sleeping," Williams says
